## 25X1A [redacted] Comments.

- (1) The report mentions empty trains being assembled in Frankfurt/Oder and Freienwalde, trains with soldiers going from Loissen and Meinsdorf to Jueterbog, and trains with soldiers leaving Jueterbog for the U.S.S.R. It is firmly believed that a large processing camp is located in Jueterbog for troops to be discharged from units of the Third Gds Lcz Army and possibly also from some units of the First Gds Lccz Army. The troops on the trains reported are believed to have been due for demobilization.
- (2) Having an average capacity of about 1,000 men, the train is believed to have carried 700 to 800 officers who came from the U.S.S.R. It was previously reported that the leave trains running between Frankfurt/Oder and Brest Litovsk between 25 and 29 October carried an daily average of 190 men on the eastbound trips as against 700 men on the westbound trips. See [redacted]. It is therefore possible that the westbound leave trains may also have carried new arrivals from the U.S.S.R. The large number of officers who arrived in Frankfurt/Oder on 30 October were probably assigned from Frankfurt/Oder to units in the Soviet zone of Germany.
- (3) Possibly shuttle-train [redacted] according to another source was seen on the Falkenberg-Jueterbog-Fusternmark line on 26 October 1950 carrying recruits in 52 boxcars. [redacted].
- (4) It is possible that the influx of recruits which started on 26 September 1950 may have ceased in the last days of October, since on 30 and 13 October 1950 two shuttle-trains which previously hauled recruits from the U.S.S.R. returned empty to the Soviet zone of Germany via Kuestrin and Guben respectively.
